Quote

“The ban on liquids surely makes sense given the lack of a reliable, efficient way to detect liquid explosives on the passenger screening line. But the other fine distinctions in this directive make us think the best approach would be a ban on virtually all carry-on items, or at least a limit of one small personal bag per passenger to tote travel documents, keys, vital medications, reading materials and any other minimal items that are allowed.”

Add or change this opinion item's references

This item argues for the position United States should ban carry-on liquids on the topic 2006 transatlantic aircraft plot.
