**Quote**

“The biggest void in the legislation is any major effort to control medical inflation by rewarding doctors and hospitals for results, not for the volume of services performed. This is a complex issue, but the nation needs to at least start down this path. A good place to begin would be creating a national database showing which hospitals and treatments had the highest success rates.”

”

Add or change this opinion item's references

This item takes a mixed stance on the position Act should be passed on the topic Patient Protection and Affordable Care Act.
