Form talk:Source

It looks like this doesn't work anymore. Sorry, more specifically, "show on select" is not hiding form elements that should be hidden unless a specific value is selected.

Hi, I've been redoing the Javascript. Actually, it should work again now. [Yaron Koren](#) 20:15, October 19, 2010 (EDT)

When will it work again?

When will it work again?

When will what work again? [Yaron Koren](#) ([talk](#)) 02:48, March 14, 2014 (MSK)

show on select not selecting div, showing all.

I have used the example but I can't get it to work. Fields for all div sections show (like the first commenter), was hoping only the div section selected in the 'show on select' would show, others would be hidden. Yoran mentioned he fixed the JavaScript, is this something not part of the standard mediawiki (I am on MW 1.26.2 and SMW 2.3 alpha)

You should ask about this on the Page Forms talk page on mediawiki.org, this is the wrong place for it. [Yaron Koren](#) ([talk](#)) 23:51, November 15, 2016 (MSK)
