Quote

“ Each year, millions of uninsured Americans find coverage through a new employer, Medicaid, or other means. In fact, the number of uninsured has fallen every year since peaking after the 2008 recession. Many of the 1.2 million newly insured through the exchanges likely would have found coverage regardless. Moreover, we know that at least 5 million families have received cancellation notices. Some policies have been temporarily extended, and some have not, but all will lose their insurance once the law goes into full effect. ”

Add or change this opinion item's references

This item argues for the position Act should not have been passed on the topic Patient Protection and Affordable Care Act.
