Template:Topic

This template holds information on a political topic. It should be called in the following format:

```
{{Topic
|Start date=The date at which the topic started, if there was one
|End date=The date at which the topic ended, if there was one
|Themes=The theme(s) of this topic, separated by commas if there's more than
one
}}
```

An example of start and end date would be, if the topic is a bill, the date the bill was introduced in Congress, and the date it was signed into law, respectively.

The order of the fields is not relevant. This template defines the table "Topics". [View table](#).
